Subject: Site 5 Backfill Stockpiling WP - VDEQ comments

Team -

I have reviewed the referenced document and submit the following VDEQ comments:

1. Under the heading - Backfill Stockpiling, last sentence - it states that the stockpile areas are in the northern portion of the site but it appears from Figure 3 that the areas are west of the site. Please clarify.
2. Under the heading - Demobilization, last sentence - it states that erosion and sediment controls will be removed and disposed of off site - reuse of the straw from the hay bales following restoration of the site may an option. The VDEQ supports the reuse of materials as appropriate.

Thank you for the opportunity to comment.
